DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The amended title is broader than the original title. The examiner suggests the applicant to change the title to "A integrated circuit package with a varied pitch distance."

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-16 rejected under 35 U.S.C. 102(b) as being anticipated by Searls (US 6,752,635 B1).

Searls discloses an apparatus comprising a printed circuit board (PCB) 202, a connector 204, and a land grid array (LGA) integrated circuit (IC) package 208. Searls teaches that the connector 204 includes two different contacts pins 118 and 240, wherein the pitch of the contact pins 240 is smaller than the pitch of the contact pins 118 (see column 3, lines 63-67). Figures 2A-2E show the PCB 202, the IC package 208 and the connector 204 having a plurality of contacts corresponding to each other such that the PCB 202, the IC package 208 and the connector 204 can be electrically connected to each other. Also, Figure 2A clearly show the plurality of lands including a vertical pitch having a first distance and a horizontal pitch having a

second distance. Although Searls does not state that the PCB 202 to be a motherboard and the connector 204 to be a zero insertion force (ZIP) connector, the main PCB in an apparatus is usually called a motherboard and Figure 2B of Searls clearly shows that the connector 204 of Searls is ZIP connector. Column 3, lines 16-31 describes that the IC package 208 has at least one input/output connector (pin and land).

Response to Arguments

4. Applicant's arguments with respect to claims 1-16 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
